Aphasia and Related Neurogenic Communication Disorders

Aphasia and Related Neurogenic Communication Disorders covers topics in aphasia, motor speech disorders, and dementia. Organized by symptom rather than syndrome, this text provides a foundation for understanding the disorders and learning how to apply basic theory to clinical practice in the development of rehabilitation objectives. **Aphasia and Related Neurogenic Communication Disorders** applies a clinical integration of the psychosocial with the neuropsychological approach in adult language rehabilitation. Written by international authorities in the field of aphasia and related communication disorders as well as based on the ICF framework, this text is unique featuring the international contribution covering global issues. Each chapter includes learning objectives, illustrative case studies, and review questions to facilitate student learning. This is an ideal book for graduate classes.

Ilias Papathanasiou, PhD, FRCSLT
